

A. Determine the gender distribution of hires. How many males and females have been hired by the company?

total no of male Hired	2563
total no of female Hired	1856

Function used

=COUNTIFS(\$C:\$C,"Hired",\$D:\$D,"Male")

=COUNTIFS(\$C:\$C,"Hired",\$D:\$D,"Female")

B. What is the average salary offered by this company?

Note- First, we need to remove the outliers i.e. to remove the salaries below 1000. here I use new column to calculate outliers as "NA".i.e. column H and above 100000

Avg salary offered:	49892.13
---------------------	----------

Function used

=AVERAGE(\$H:\$H)

C.Create class intervals for the salaries in the company.

Calculate Range and Interval Size	399900
Interval Size	39990

Satarting point of class Interval 1000

ending point of the first class interval 40990

80980

120970

160960

200950

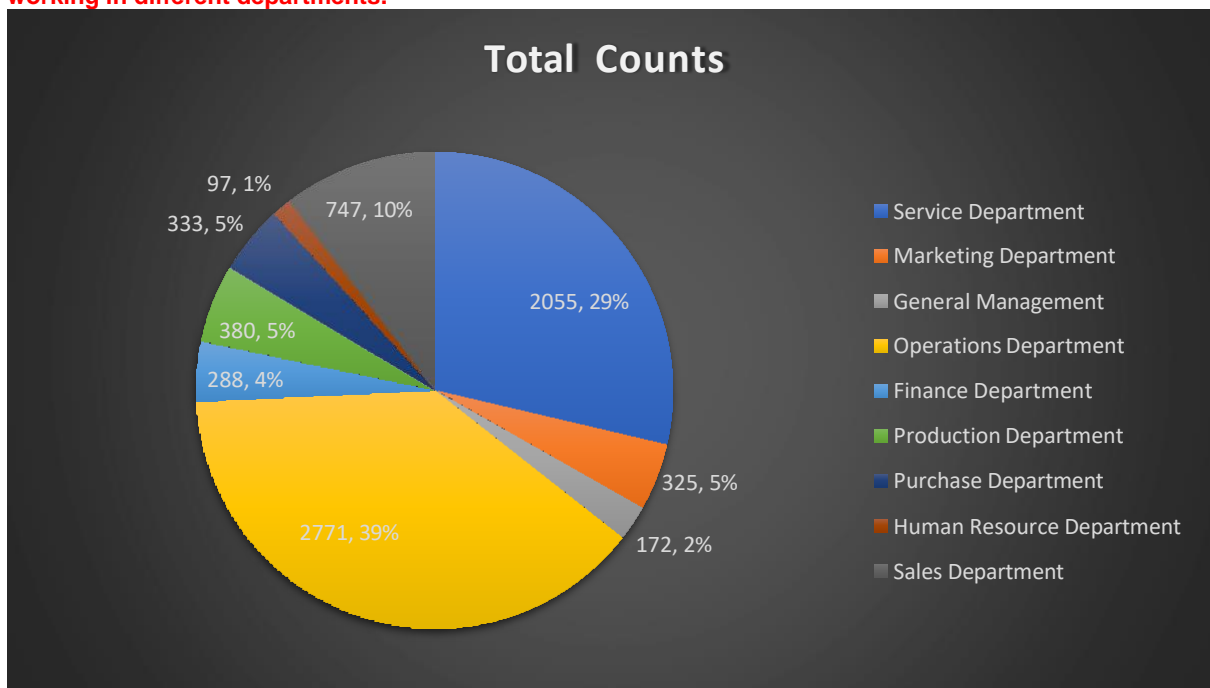

240940

280930
320920
360910
400900

ending point of the last
class interval

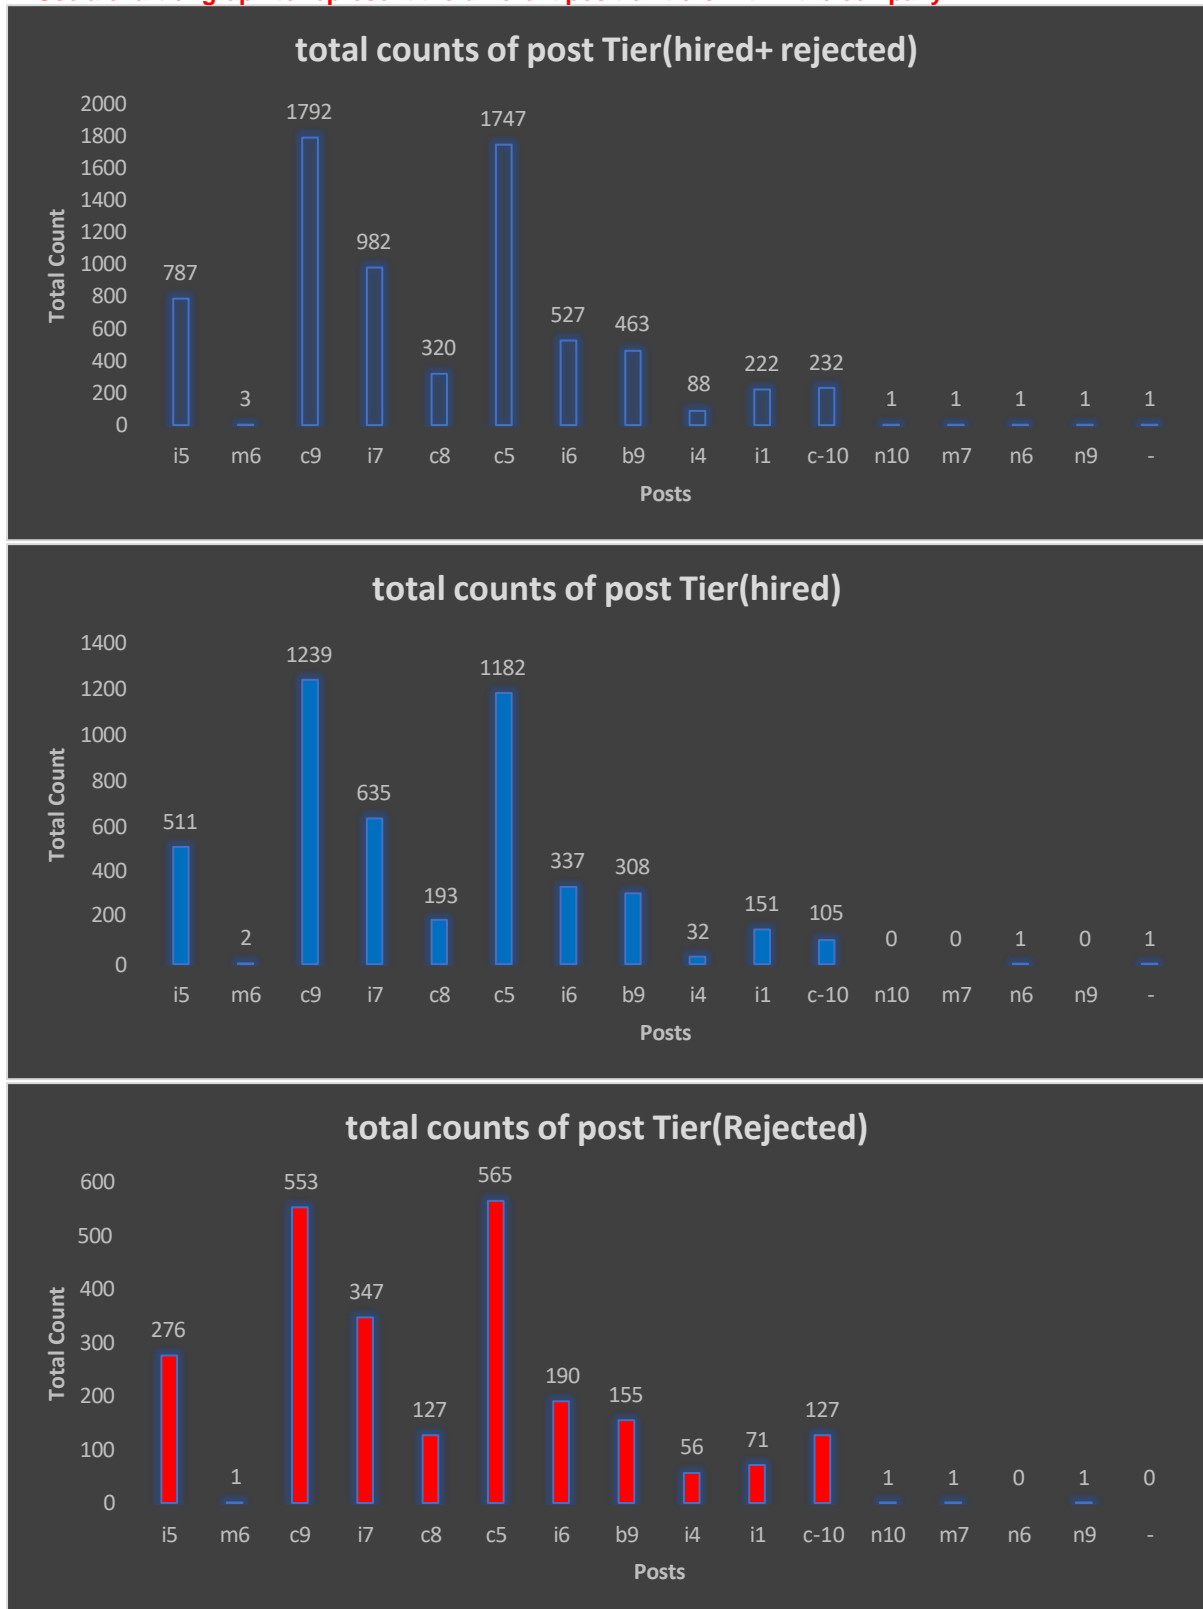

D. Use a pie chart, bar graph, or any other suitable visualization to show the proportion of people working in different departments.

E. Use a chart or graph to represent the different position tiers within the company.
